

AMENDMENTS TO THE SPECIFICATION

Please replace the paragraph beginning at page 13, line 32, with the following rewritten paragraph:

The outer nozzle pipe 19 extends from the cold side 7 to the hot side 5 of the nozzle body by passing through the metal jacket 9 and the nozzle body 3. The outer nozzle pipe 19[[15]] is made of stainless steel and runs so that it is rotationally symmetrical with its longitudinal axis A which is perpendicular to the hot side 5 and the cold side 7 of the nozzle body 3.
